

# The Coleopterist Cumulative Species Index, Vols 1-29 (1992-2020)

Prepared by Martin Luff, December 2020

## Notes:

- 1) Volume numbers are emboldened.
- 2) Volume 1 was issued in three separately paginated parts. In volume 1 therefore the parts 1-3 are in parentheses: thus '**1(1)**:13' is volume 1, part 1, page 13, '**1(2)**:6' is volume 1, part 2, page 6, etc.
- 3) No allowance is made for changes in nomenclature or mis-spellings in the magazine indices: the same species is often indexed under several names, sometimes even in the same volume. This applies especially to former sub-genera that are now treated as genera in the 2018 checklist, such as those in the former genus '*Aphodius*'. In such cases search for the specific name.
- 4) No responsibility is accepted for errors or omissions! If you find any, please email details to martin.luff@gmx.com
